*****RIDE SUGGESTIONS*****

If anyone has overnight ride suggestions please e-mail goldsborohog@yahoo.com With overnight ride in subject line

There's no denying that motorcycles are cool, fun. And fuel-efficient. But it's also true that riding a motorcycle is more risky than driving a car. To make sure you stay on the safe side of riding, here are 10 ways to keep your rides incident free.

1. **Gear UP-** Looking cool is not the top priority when getting on your bike. No matter how HOT it is outside, shorts, a T-shirt and sandals are not proper riding attire. Even jeans provide minimal protection. Glasses and goggles are a must if you have an open –faced helmet and to protect your hands, you should always wear gloves. In warm weather there is specially designed gear that is intended for ventilation and cooling. And, it should go without saying, NEVER ride without a DOT- approved helmet.
2. **Stay in the comfort zone-**know your abilities and make sure that neither your chosen route or motorcycle is more than you can handle. If you're riding with a group, don't push yourself just to keep with the pack. Always ride to your comfort level, not theirs. Your bike should fit you!
3. **Inspect your ride-** Give your bike a good once-over before hitting the road. Things you should check out every time you get on your motorcycle include tire pressure, mirrors, and lights. You also need to be diligent about regular care and maintenance. Don't delay fixing something that needs attention.
4. **Use your head-** To keep cognizant of your surroundings and your position in relationship to those around you, you need to use your head.
5. **Watch the Road-** As a motorcyclist, you need to pay attention to the road you are riding on. Err on the side of caution when going into curves; be vigilant for potential gravel or other unstable road conditions.
6. **Find your happy place-** One of the biggest dangers to a rider is getting on your bike in the wrong state of mind. Riding angry, drowsy or distracted can be a recipe for disaster. When you're on a motorcycle you are ultimately the only one on the road looking out for you. If your mind and emotions are anywhere other than the road ahead, you are susceptible to making rookie mistakes that can end in a crash, injuries, or worse.
7. **Know the forecast-** Weather is a regular foil to perfect driving conditions and the dangers of wet or icy roads multiply when you're on two wheels.
8. **Make sure two isn't a crowd-** Make sure you are comfortable with a passenger and also make sure that your passenger knows how to do their parts to make sure the ride stays safe.
9. **Brake for motorcycles-** Always double check when changing lanes or turning. Practice braking in all sorts of conditions. And always give extra space to the vehicles in front of you and know how to stop on a dime without locking our brakes.
10. **Spread the love-** There's no denying that motorcycles are often overlooked or regarded as the second class citizens of the road. As a rider, you have the chance to help make that different. When you're on the road, always drive as if you are an ambassador for motorcyclists everywhere. Ride with courtesy, care and awareness that you are representing motorcycles for those around you.
